PREFACE

Since March 20, 1922, the annual appropriation acts for the Office of the Superintendent of Documents have included the appropriation for distribution of public documents to depository libraries with the provision that no part of this sum shall be used to supply to depository libraries any documents, books, or other printed matter not requested by such libraries.

In order to enable libraries to make the selection required, this list has been prepared, arranged alphabetically by executive departments (or independent establishments), and by bureaus and series thereunder, with a brief description of the character of the publications. An opportunity to make selection of new publications not covered by this list will be given to libraries from time to time in the future, as necessity may arise.

This list includes all classes of publications made available for distribution to the libraries and replaces the five lists previously issued for selective purposes.

As the law makes the selective plan for depository libraries mandatory rather than a privilege, it is necessary that this list be promptly checked and returned to the Superintendent of Documents in order that libraries may receive their depository shipments.

An item number has been assigned to each entry so that in making changes in selections reference may be made to item number instead of referring to title or class of publication.

INSTRUCTIONS

Check against number shown opposite entry if you wish to receive copies of the publications described therein and fill in the information called for below:
